# Who we are

---

Born in the heart of Campania, Tecnoproggress srl is a solid and dynamic company founded by a team with over 30 years of experience in the industrial automation sector.

We specialize in the design and manufacturing of automatic secondary packaging machines, with the goal of offering our customers reliable, efficient, and customized solutions.

Over the years, the acquired know-how has allowed us to operate in various production sectors – both food non-food – becoming a **trusted technical partner** for italian and international companies

## TECNOPROGRESS SRL

Tailor-made solutions for  
packaging automation

"Coming together is a beginning;  
Keeping together is progress;  
Working together is success."  
-Henry Ford

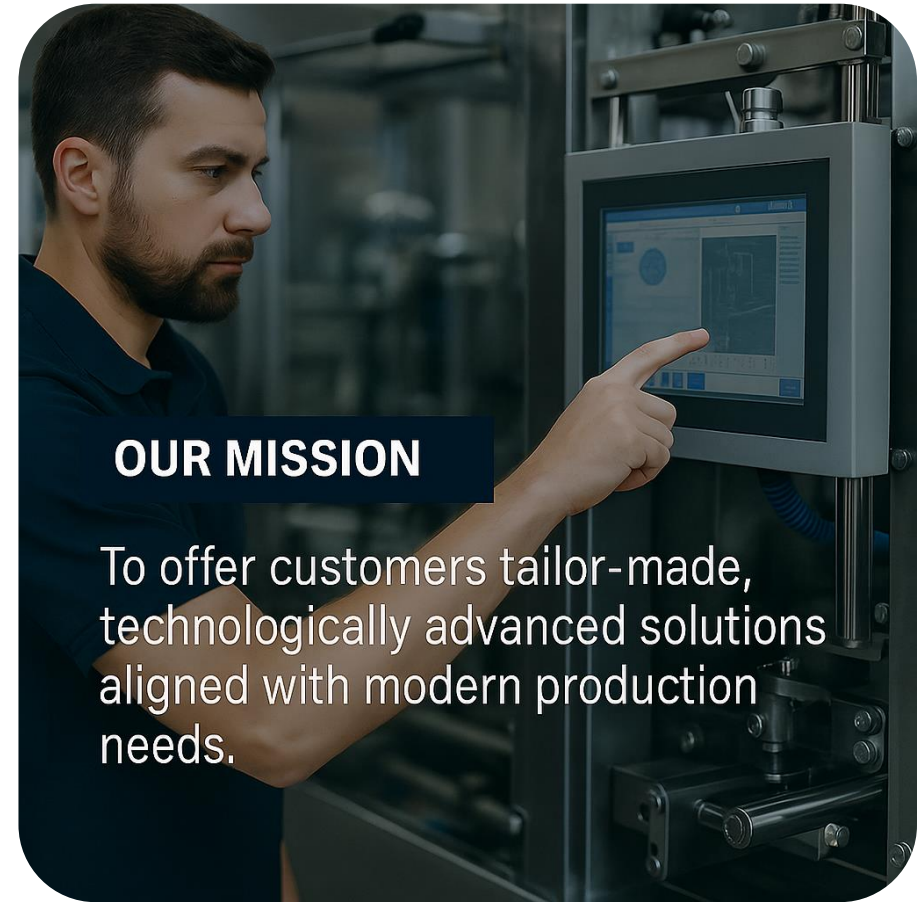

# Our mission

---

To offer customers tailor-made and technologically advanced solutions aligned with modern production needs.

Every day, we are committed to designing solid, intuitive, and sustainable machines and systems, built to last overtime.

Our mission is to transform ideas into concrete solutions by combining **innovation**, **experience**, and **attention to detail**.

## OUR MISSION

To offer customers tailor-made, technologically advanced solutions aligned with modern production needs.

"To innovate every day in order to offer tailor-made solutions that make production more efficient, safe, and sustainable."

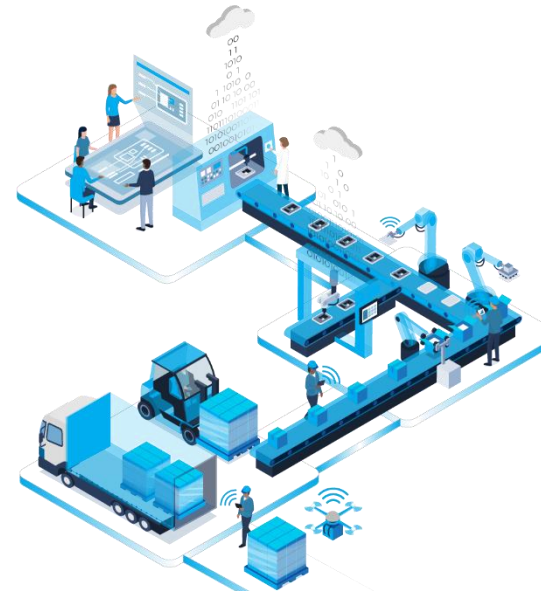

giugno 2019

# Our values

-  **Reliability:** every project is developed to ensure operational continuity and minimized downtime.
-  **Quality:** we select only certified components and take care of every construction detail.
-  **Flexibility:** we adapt to the customer's needs with tailor-made solutions.
-  **Sustainability:** we focus on energy-efficient machines with low environmental impact.
-  **Collaboration:** we believe in the value of people – customers, partners, and team – as the driving force of success.

# Customized services for the customer

---

Our strength lies in our ability to create customized solutions tailored to the needs of each production plant.

We offer a complete package of customized services:

- **Design** and manufacturing of automatic machines for secondary packaging.
- **Revamping** of existing machines and lines.
- Ordinary and extraordinary **maintenance**.
- Continuous **technical support**, including remote support.
- **Sale** of original spare parts and equipment.
- Production of modular, rollers and belt **transport systems**.

Each service is designed with a single objective: to ensure efficiency, safety, and productivity.

# Where we are and our departments

---

We operate in the industrial area of Eboli (SA), in a facility equipped with all the departments required for the complete production of automatic machines:

- Metal carpentry department.
- Machine tool department (Lathes, milling machines, and CNC machining center).
- Mechanical, electrical, pneumatic, and hydraulic assembly department.

This internal structure allows us to **control every phase of the production process**, ensuring fast lead times and high quality standards.

# Why choose us

---

INTERNATIONAL  
EXPERIENCE

CONTINUOUS  
SUPPORT

STREAMLINED  
STRUCTURE

CUSTOMIZED  
DESIGN

ENERGY  
EFFICIENCY

RELIABILITY

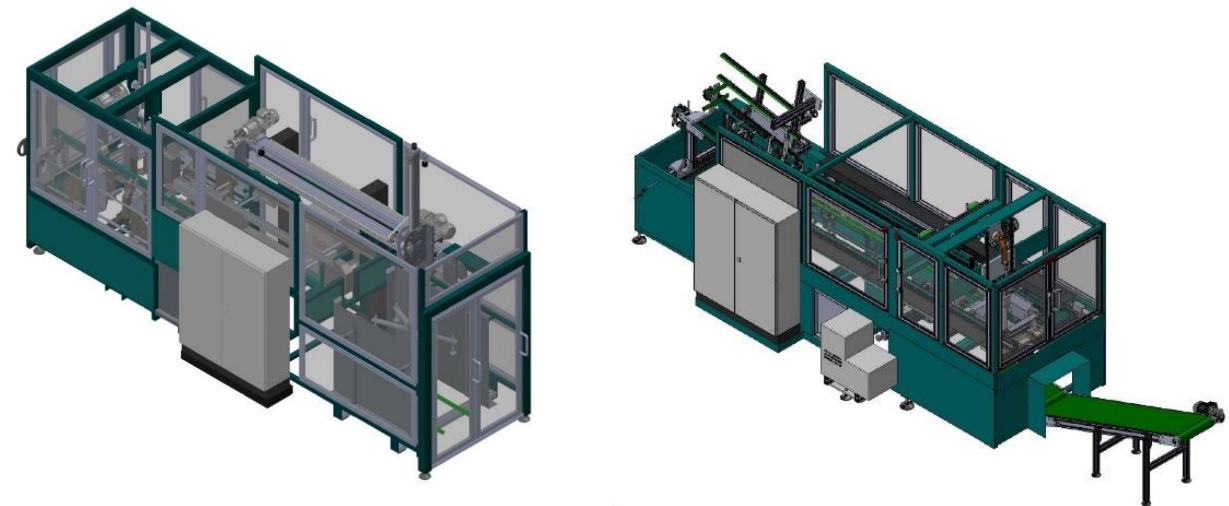

# How our machines are built

Every machine is born from the **passion** and **expertise** of our team. From the first technical drawing to the final testing, every stage is managed internally to ensure **precision**, **reliability**, and **safety**.

Our machines are:

- **Easy to maintain.**
- **Intuitive to operate.**
- **Adaptable to different formats and products.**
- **Designed in compliance with European and environmental standards.**

We strive for perfection in every cable, screw, and component — because for us, quality is not an option, but a promise.

# Our industries

---

We collaborate with companies across different production sectors:

-  Dry and fresh pasta
-  Sweets e snacks
-  Rice and cereals
-  Fresh and frozen vegetables
-  Chemical and plastic sector
-  Pet food

Each sector has different needs: we interpret them, analyze them, and transform them into **customized automation solutions**.

“ We are different because people matter to us — from our technicians to our customers, who allow us to grow every day”

# Market comparison

Aspect	Tecnoprogress srl	Other suppliers
Customization	Complete, tailor-made	Based on standard consolidated solutions
Technical Support	Direct and continuous	Generally managed through centralized channels
Response Times	Fast and flexible	Planned according to internal processes and availability
Build Quality	High, with certified components	Varies depending on models and component suppliers
Maintenance	Simplified and easily accessible	Managed through standard procedures and scheduled service
Innovation	Constant, based on customer feedback	Aligned with the evolution of the reference market

# We are the solution

---

Contact us to check the status of your machines or plants, or to develop new projects.

We are confident that together **we will find the most convenient and efficient solutions** for your production needs.

Our experience gained across various industrial sectors allows us to support and advise our customers for any requirement, with no obligation.

Trust us — we are the supplier you were looking for.
