The History

Since 1970,
in the Converting World

1970

Guzzetti
Foundation

1975

Mr. Natale Guzzetti patented the invention of the first automatic core loader for the rewinding of adhesive tape rolls.

1980

Launch of the first fully automatic slitter for adhesive tape
IN THE WORLD.

1990

Guzzetti implemented its production range by producing coating lines for adhesive tape, and the **NEW GENERATION** of fully automatic slitters was launched on the market.

2001

Guzzetti moved to a brand new headquarter, and started to produce wrapping and packaging units.

TODAY

From over 40 years,
Guzzetti reconfirms its worldwide leadership in the converting market of adhesive tapes, improving day by day its technology to guarantee **maximum efficiency, reliability and productivity.**

The Company

From Italy
to all Over the World

Turate (CO) - ITALY

The GUZZETTI company was founded in 1970 by the will of Mr. Natale Guzzetti, the depositary of the patent for the first automatic core loader.

Then, in 1979, when his sons Mario, Franco and Gabriele joined the company, the first automatic slitter was also built and launched in the market.

Since then the GUZZETTI staff has always committed itself to optimize machinery meant for the processing of any type of tape and film.

GUZZETTI owes its success to the constant technological innovation adopted in the construction of slitters/rewinders of its brand name as well as to its owners' persistent farsightedness and ability that over the years have made possible the know-how acquisition of two other major businesses.

Thus GUZZETTI entered the new millennium as an indisputable recognized leader not only for its tape slitting rewinding equipment,

but also for the design and construction of coating lines as well as wrapping and packaging units.

Thanks to its highly skilled technical staff, its attentive commercial department bent on meeting the most recent market needs and the efficiency of its after sale service, GUZZETTI can always offer the best solution to satisfy the most demanding requirements of its clientele.

Today more than ever GUZZETTI's assures current customers as well as all future potential producers/converters professional consultancy and know-how.

Honesty, perseverance and hard work have been key elements for the accomplishment of GUZZETTI's worldwide leadership, an outstanding example of excellence in business enterprise.

- **85** Employee
- **1** Project Engineering Department
- **14.000 sq/m** of Production Space
- **2000 sq/m** of Corporate Offices
- **1** Machine Parts Production Plant
- **1** Assembly Plant
- **1** After-Sales and Spare Parts Division

A skilled Team of Specialist can provide:

Plant Capacity Analysis

Production Plant Lay-out

Assistance in the Realization
of Complementary Services

Raw Material Identification and Sources

Basic Formulation and Recipes

PACKAGING

Flat packaging
Accordeon & tower
Single pack, accordeon & tower
Cartonising machines
Palletizers

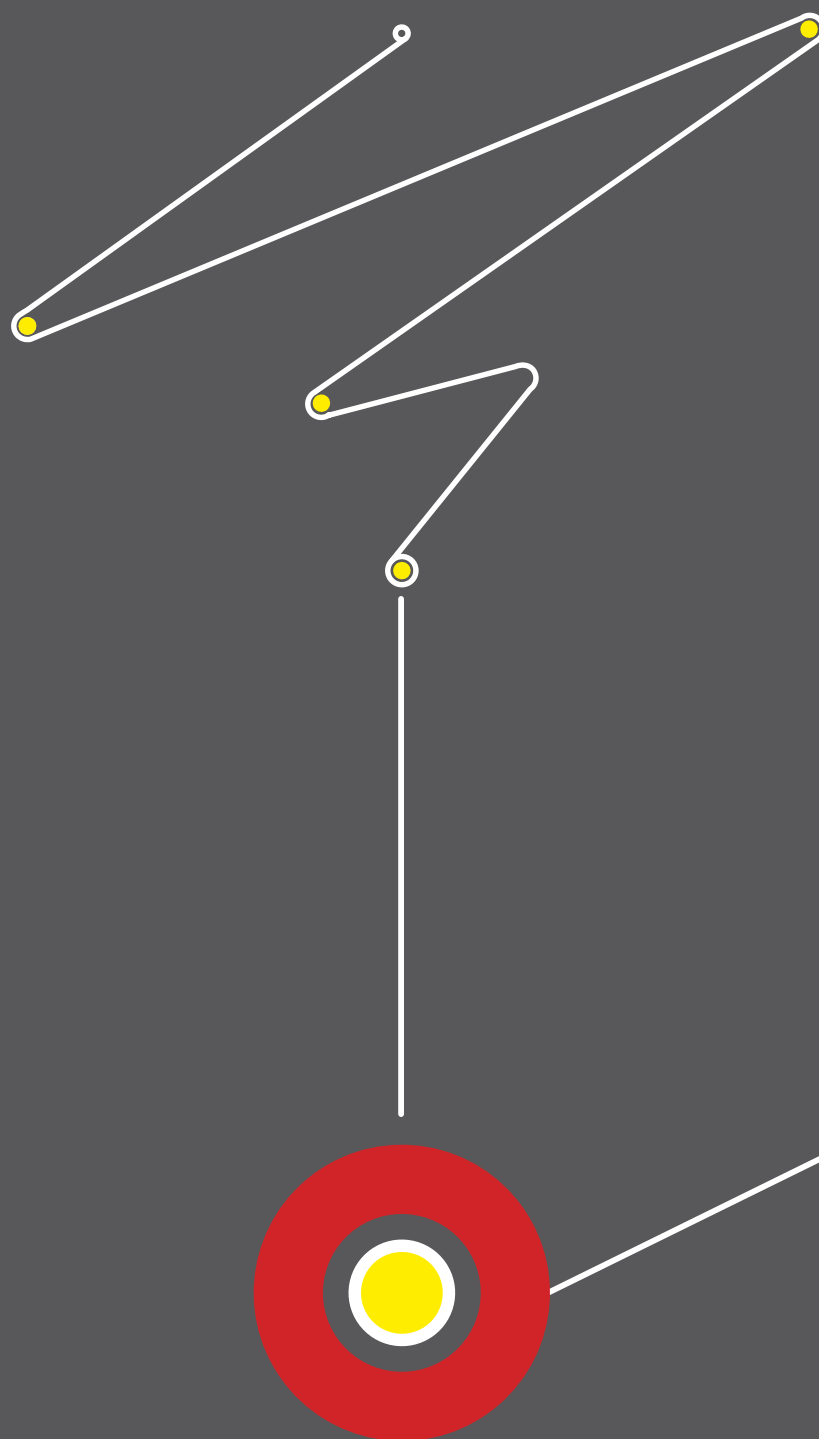

the ideal partner for those who are already *tape producers and converters* as well as for those who want to introduce themselves in the converting world. Guzzetti takes the Customer "by hand" giving him THE BEST SOLUTION IN TERMS OF QUALITY OF MACHINERY AND KNOW HOW. Thanks to the wide range of manufactured machines, it is able to satisfy the Clientele on the basis of its particular production needs:

COATING LINES: up to a maximum speed of 800 m/min, according to the type of adhesive and coating technologies employed.

SLITTER REWINDERS: from 1000 mm to 3000 mm web width, with production cycle from 15 sec to 35 sec for small rolls, and rewinding speed up to 700 m/min.

Different models of **PACKAGING UNITS** (for manual or automatic feeding), meant to satisfy all different configuration demands and production volumes.
