Packaging

# Company History

**Our identity, a tradition based on quality design and tailormade manufacturing, all Italian**

Few people know that Gandus history goes back to **1885**, when a distinguished gentleman named Prospero Gandus founded his company in Milan.

The production began with paper bags to contain the needles for the sewing machines.

Craftsmanship and precision, all Italian.

Since its foundation Gandus has been a manufacturing company. And since its foundation Gandus has been managed by Prospero Gandus first and his descendance then.

In **1954**, Gandus enters the world of packaging machinery, in the **'60/'70** manufactures the first heatsealers for bags in PE and heatsealable coated laminates. The word "Saldatrici" (in English Sealers) goes to complete the brand name Gandus and the Company affirms itself immediately on the market thanks to professionalism, reliability, high quality constantly in time.

# Company History

Since then, Gandus Saldatrici has been a point of reference for the production of heat sealers to hermetically seal polyethylene, paper and aluminium bags and heat-sealable coated laminates in general.

During the **60es/70es** Gandus Saldatrici focussed its activity on the production of heatsealers for closing bags in PE and heatsealable coated laminates.

In the **80es** the Company develops and manufactures the first model of medical sealer for sterilization pouches and since then has grown up to become the national and international point of reference in the medical packaging industry.

In **2007** times were ready for a further evolution. With the aim to constantly support our customers in their growth, which often leads to the need to work with very powerful machines, we have created a special Division dedicated to Automatic Packaging.

# Company History

With a view to constantly increasing the completeness of its offer in the packaging market in **2021**, Gandus Saldatrici incorporated Bustaplast Flexible Packaging, a historic company specialized in the processing and marketing of Flexible Packaging Materials.

Today Gandus Saldatrici consists of 4 specialized **Divisions** that offer 360° packaging solutions combining a wide range of packaging systems developed in more than 100 versions, to a wide and complete offer of flexible packaging materials, characterized by high quality and innovation always in line with evolving market realities.

*We care*

Our Mission is to design and manufacture top quality packaging solutions.

Our Vision is to offer our customers the opportunity to find inspiration, innovation and the best solutions for every packaging need.

Our Values are Entrepreneurship - Skills – Team working – Commitment – Responsibility - Respect for everyone Communication – Professionalism and Fairness – Continuity – Quality – Tailor made manufacturing

# Quality Politics

Gandus Saldatrici is a company born and developed with the aim of introducing itself on the domestic and international markets as a leading referent for the solution of any packaging need.

To reach this target, Gandus Saldatrici has developed a management system, able to satisfy the following internal and external needs:

- § CONFORMITY OF PRODUCTS
- § CUSTOMERS' SATISFACTION
- § CONTROL OF PRICES
- § COMPANY STAFF SATISFACTION

The innovation in the manufacture and/or the distribution of machines more and more suitable to any market need, allows Gandus Saldatrici obtaining a high level of customers' satisfaction standard, increasing its own customers' trust.

At the same time the continuous technological up-dating allows the company being able to offer products which can satisfy the more and more different technical and economic customers' requirements.

# Quality Politics

This “market oriented” development of the company can not leave out of consideration the complete, positive and active participation of the whole company team, which has to be involved in the whole company life.

The professional skills offered to the customers and the suppliers have to be the main feature of any people, working together with Gandus Saldatrici.

The reliability and tradition of a brand born more than 100 years ago, are the main guidelines of the quality politics of the company.

Working on these basis Gandus Saldatrici will keep on strenghtening the following features:

- to consolidate its position in the domestic market
- to develop new products, in order to introduce itself in unexploited market's areas
- to increase its presence in the international market, improving the relationships with the potential foreign customers on the mutual trusting basis, which have been the reason of its success in the domestic market
- to be able to always offer to its collaborators a structure, allowing them their certainty and professional growth

# Quality Politics

# Medical and Life Science Packaging Division

Born in the '80s, Gandus Saldatrici Medical and Life Science Division can now be defined one of the leading European producers in the medical field.

Its wide range of models, satisfies any packaging need of medical sterile products both in premade pouches and reels, from the small laboratory to the great hospital, from the producer of medical disposables to the big pharmacy industry.

A yearly investment of 50% of its R&D budget in developing medical sealers allows the Company to launch in the market at least a new model every 10 months.

Gandus Medical and Life Science Division offers:

- pouch maker
- impulse sealers
- rotary sealers
- pouch packaging station

## Medical and Life Science Packaging Division

Each range offers different models according to specific requirements: Validation process, location of use, kind of sealing, print facility and cutting device need, human interfaces and communication with external devices, output requirements.

Gandus offer in Medical and Life Science field also includes:

- routine tests to enable you an easy, quick and safe daily control of your sealing device in order to comply EN ISO 11607.1.2 and ASTM F1929
- Process Traceability Management and Solutions Softwares
- Services totally dedicated to the Validation Process on all Gandus validatable medical sealers

ISO  
11607-2

ASTM  
F1920

EN  
868-5

# Industrial Packaging Division

The Industrial Division presents a whole range of sealers and packaging machines able to satisfy any requirement in the field of packaging in the most different markets.

Its steady development allows its leading presence in the most technologically advanced markets, positioning Gandus Saldatrici as an extremely qualified partner.

Gandus Industrial Division offers:

- manual sealers
- heavy duty sealers
- rotary sealers

# Automatic Packaging Division

A wide range of Vertical VFFS machines and Dosing systems designed and manufactured with the highest quality certified standards and the highest tailormade design flexibility.

Constructive solutions with prevalence of mechanical precision, without any pre-formed aluminium, highest attention to ergonomics and design, selection and choice of reliable and quality partners.

Over 450 customized projects have led us to the third generation of machines, to ensure the ideal solution to each single automatic packaging requirement.

Gandus Automatic Packaging Division offers:

- Vertical VFFS machines
- Flow Pack
- Dosing Weighing systems
- Complete packaging lines

# Flexible Packaging Materials Division

Gandus Saldatrici Materials Division has its origin in 1970 in Milan with Bustaplast Srl, a company specialized in converting and distribution of polyethylene and polypropylene flexible packaging solutions.

Since its birth the company stands out as a reality in continuous development, attentive to the evolution of an increasingly demanding market and constantly looking for highly customized solutions.

Steady production development, constant investments, great production flexibility allow the Company guarantee a wide and high quality offer, matching the most specific and customized needs of companies of all sizes and product sectors: from clothing to electronics, mechanics, cosmetics, from pharmaceuticals to food, services, up to the automotive industry and logistics.

# Flexible Packaging Materials Division

Additional strategic strength is represented by **printed packaging solutions**, in which the company boasts a particular know-how that allows it to achieve optimal results, and **eco-friendly packaging**, in which its continuous investments allow to offer optimal solutions.

2007 saw the Company become an integral part of the Gandus Saldatrici Group.

In 2021 the Company is definitively incorporated by the packaging systems manufacturer, thus completing its offer and contributing to its professional successes.
