www.gsitalia.com

Born in 1982, G.S. ITALIA has grown over the years and specialised in the design and manufacturing of machines & complete lines for the Food Industries, with a peculiar attention and deep know-how in filling equipment for foods, cosmetic and chemical products. The decades of experience combined with high flexibility, technical and professional skills, continuous research of the latest technological innovations, enable G.S. ITALIA to advise and supply tailor made solutions according to customers' requirements and be competitive on both Italian and International market. Today G.S. ITALIA exports most of its production all over the world.
