department

We have at disposal 7.000 square meter for groups' and machines' assembly. Logimatic is the strategical partner for the companies that want to manage the assembly in external companies.

We also manage an assembled groups' storage service in our warehouse, our aim is to guarantee a very fast delivery service for our customer.

our services

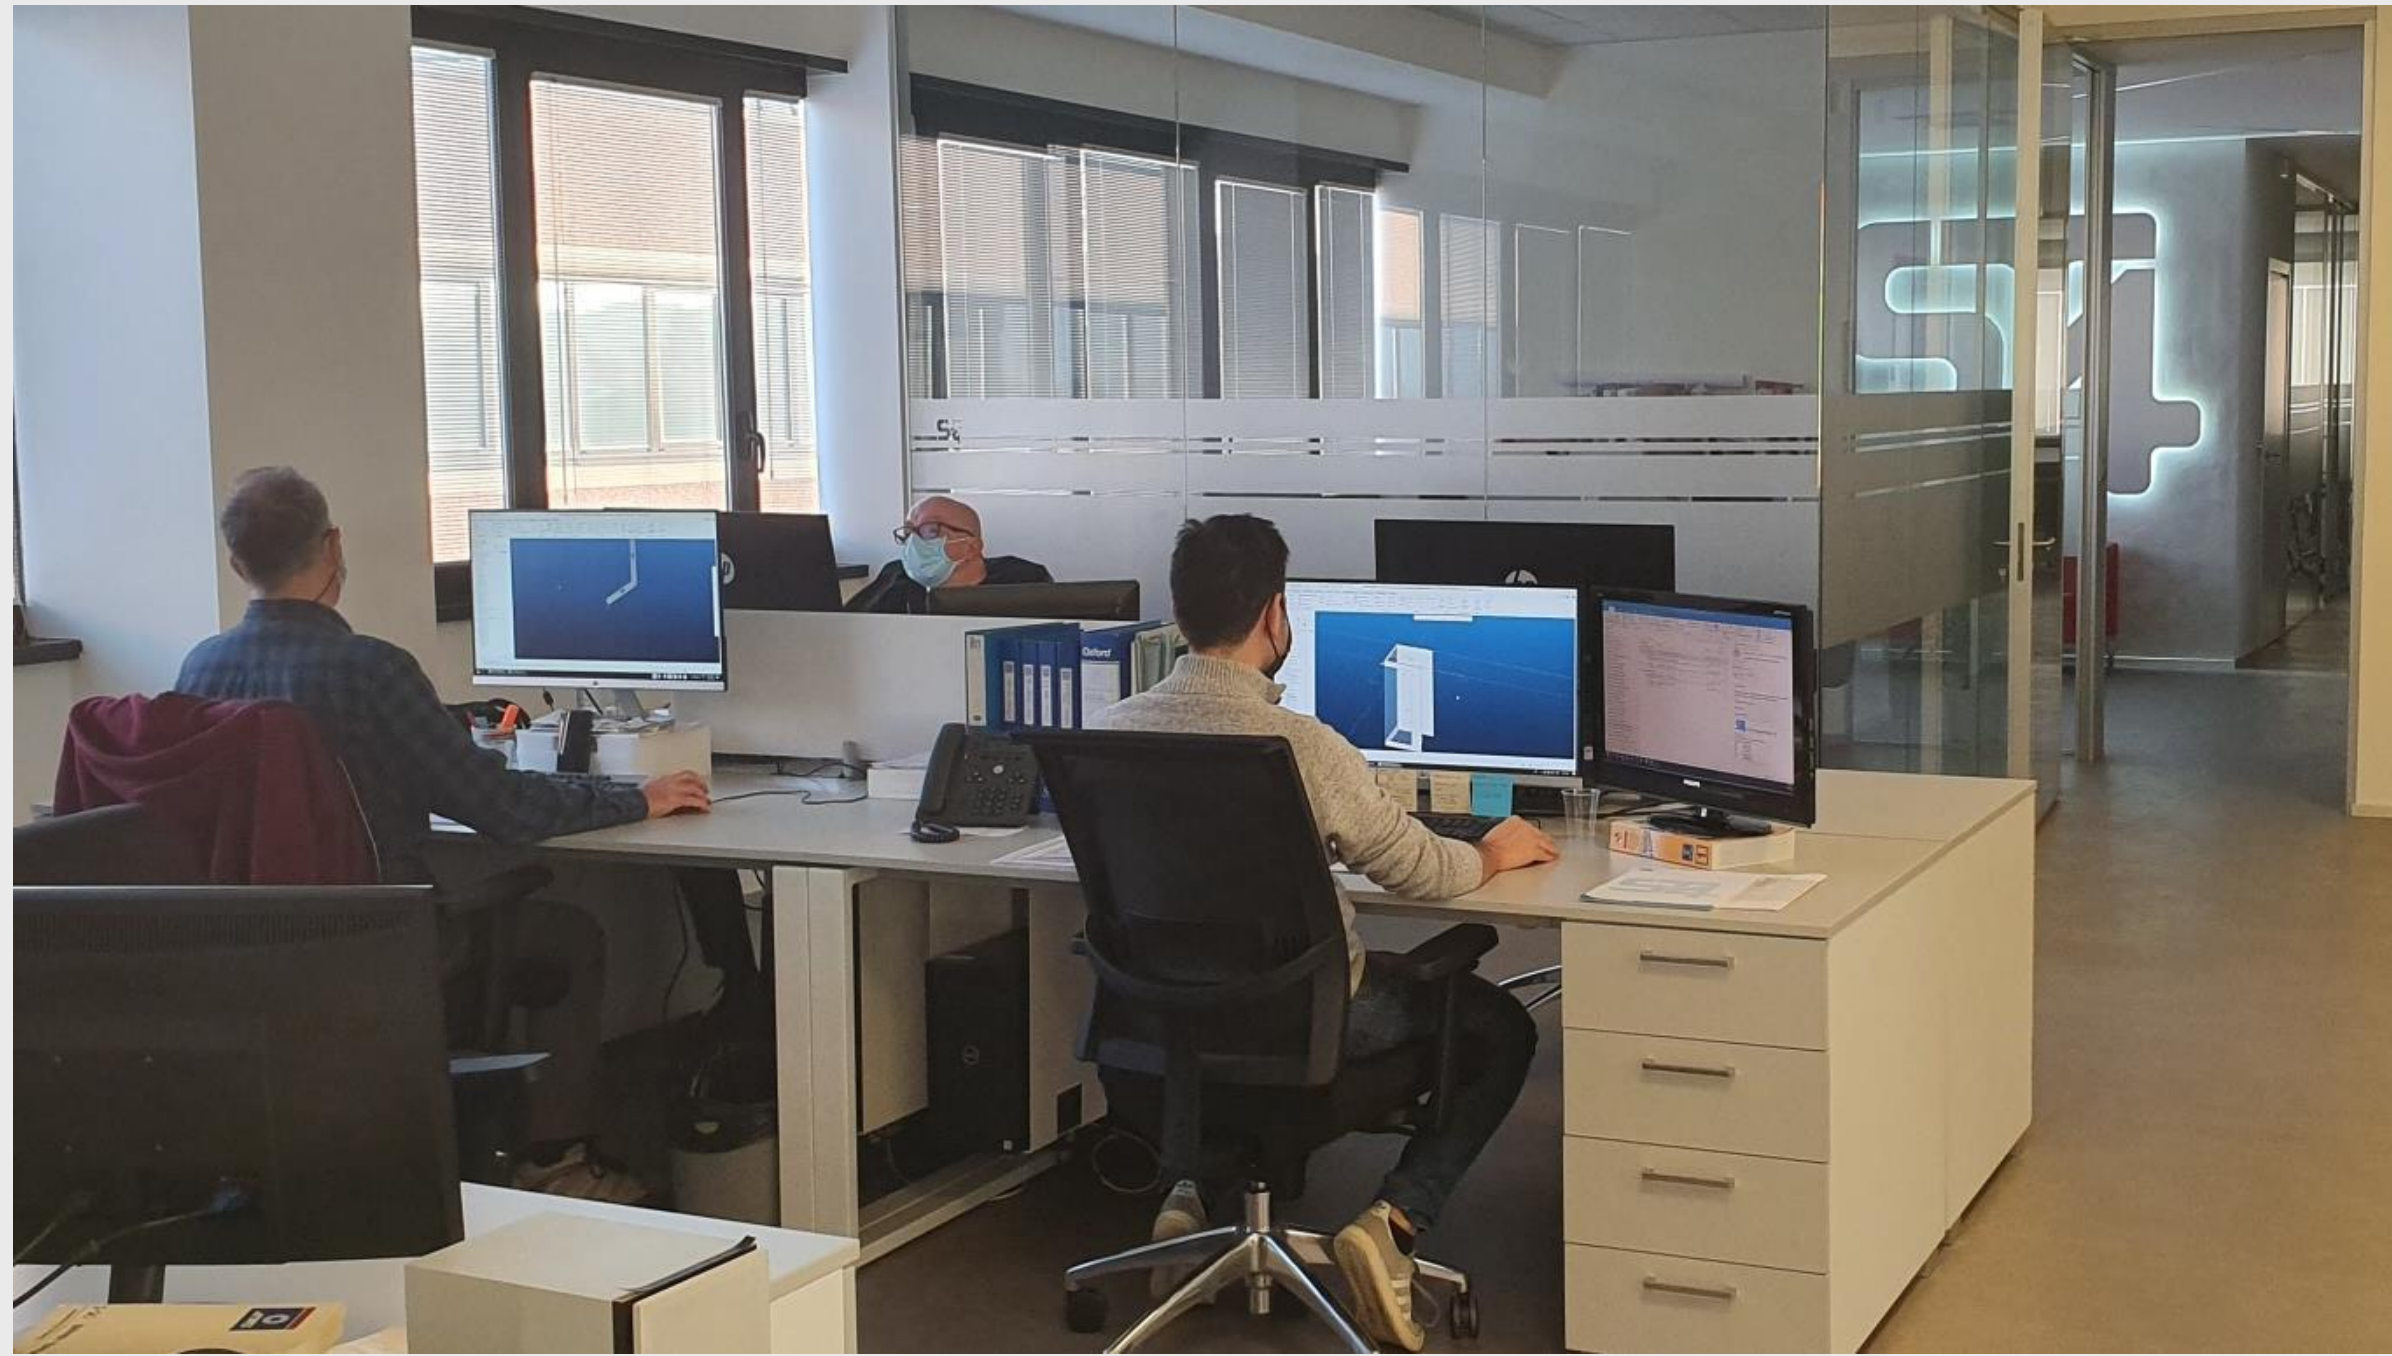

Automatic Machines and Automation

Solution Production

We project automatic machines and custom automation systems in the MECATRONICS field. Using highly specialized partners, we take care of mechanical design, software development, creation of electrical diagrams up to the drafting of manuals, Safety analysis and customer support in CE certification.

Turnkey Production

We produce automatic machines in turnkey, starting from the customer requested, from the procurement of materials to final testing in dry. We collaborate with our customers by proposing the most suitable solutions for the result, we propose the best solutions to reduce the costs and optimizing production cycles.

Solution Production

- PROJECT ANALYSIS
- MECHANICAL and ELECTRICAL PROJECT
- SOFTWARE DEVELOPMENT
- PURCHASING MECHANICAL AND ELECTRICAL PARTS
- ASSEMBLY and TESTING
- SAFETY ANALYSIS
- EC SUPPORT
- USE AND MAINTENANCE MANUAL
- SHIPMENT

PROJECT'S DEFINITION

we start from the customer's project

We constantly interact with the customer and collaborate together

The goal is to realize an high quality product with the best price ever, using different realizations' methods.

COMPONENTS' REALIZATION

Logimatic coordinates an integrated suppliers' network, that can provide single components to realize an entire machine or part of it. Each production step is regularly checked in order to preserve delivery times and production costs.

DIMENSIONAL CHECK

we certify mechanical components' quality through our internal dimensional check dept.

STORAGE AND LOGISTIC MANAGEMENT

Logimatic employs latest generation software that enables us an automated and always interconnected management of our warehouse. Every adopted logistic solution is to supervise performance flows of different areas. Our keywords are: flexibility and storage time reduction.

MECHANICAL ASSEMBLY

Thanks to our specialized assembly team, we proceed with the assembly of the final machine perfectly as requested by the customer.

FINAL QUALITY CHECK

as soon as we finish the machine assembly, we proceed with the final quality check testing, in order to guarantee the correct machine operation.

EXTRAORDINARY IS OUR DISTINCTIVE CHARACTERISTIC

We adopted innovative solutions to manage our inbound and outbound mechanical parts, in order to reduce warehouse management costs, and we're constantly revisiting and reevaluating our workflow for a better optimization.

Flexibility is the core concept of today: Logimatic's mission is to manage it in order to optimize the strategic use of all its resources.
